

Lusin[®] Lub O 32 F

A product with a game-changing impact.

Lusin[®] Lub O 32 F

At Chem-Trend, we believe in creating business-changing formulations that do more than merely release products. We believe they should release possibilities for better products, better processes, and better outcomes. With our new product, Lusin[®] Lub O 32 F, we are unleashing the potential of your thermoplastics operation.

IT ELIMINATES JAMMING.

By reducing friction between bottles, Lusin[®] Lub O 32 F eliminates the jamming of bottles on an air conveyor system.

Jam reduction gives you:

- Fewer production delays
- Less loss of labor time
- Increased safety due to fewer manual fixes

IT INCREASES PACKAGING EFFICIENCY.

Due to the ability to increase gaylord capacity, we are able to help revolutionize your transportation.

Increased gaylord capacity gives you:

- Reduced transportation costs
- Less time required to load and unload trucks
- Reduced packaging costs

IT REDUCES PREFORM SCRATCHING.

Lubrication on preforms helps prevent scratching through the multiple stages of its journey.

Lubrication helps:

- Eliminate scratches when the preform is dropped into the gaylord
- Reduce scratching during transit
- Reduce scrap and rejects
